

Unmasking Threat: Lunchtime with Google's Cybersecurity Front Line

Take a break from the ordinary and join us for a thrilling lunchtime session where we'll screen the episode "Detection and Response" from the documentary series, [HACKING GOOGLE](#). This episode offers a rare glimpse into the world of Google's cybersecurity teams and dives deep into 2021 when Google's Detection and Response Team identified an unusual network activity, dropped in, isolated the attacker, and booted them off the network – extinguishing a digital fire before it could cause any damage.

But that's not all! We'll be joined by Heather Adkins herself, Cybersecurity Resilience Officer & Vice President, Google Security Team and key figure from the documentary series, for a live chat delving into the ever-evolving threat landscape, industry best practices, how we build AI systems responsibly and the future of online safety.

Seats are limited, so be sure to get here early to guarantee your spot! Don't miss this power-packed session that will leave you informed, inspired, and ready to defend your digital world.

Agenda:

- 12:30-13:00 | Fuel Up & Network: Pre-screening Mixer
- 13:00-13:05 | Opening Address
